

FALL 2021

# PLANT GENETIC RESOURCES: GENOMES, GENE BANKS, GROWERS

FLEXIBLE ONLINE LEARNING

## COURSE HIGHLIGHTS

- Discover the origins of plant genetic resources
- What role do they play in global food systems?
- Learn about plant domestication and diversification
- What are their genetic properties and the forces that shape them?
- Explore geographic patterns of plant diversity

## THREE-PART SERIES

This is the first in a series of 1-credit graduate level courses focused on plant genetic resources use and conservation. All three courses will be offered in Fall 2022!

CSU STUDENT ENROLLMENT NOT REQUIRED

## 5-WEEK COURSE

- August 23–Sept 24, 2021
- Set your own schedule with asynchronous online classes
- Enroll on a 1-credit or non-credit basis
- Taught by Dr. Geoff Morris

## PREREQUISITES

Ideal for graduate students & professionals continuing education. An undergraduate genetics course is recommended.
